

Leopard Gecko Terrarium Starter Kit Set Up Guide

Clip the wire into place

Ensure there is a gap between the wire mesh and the plastic frame

Now we can install the T5 Fixture

Insert the T5 Tube

Position the fixture as shown

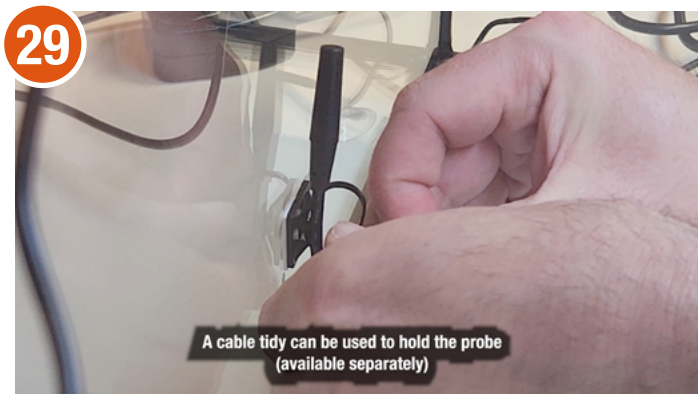

Plug in the power cable

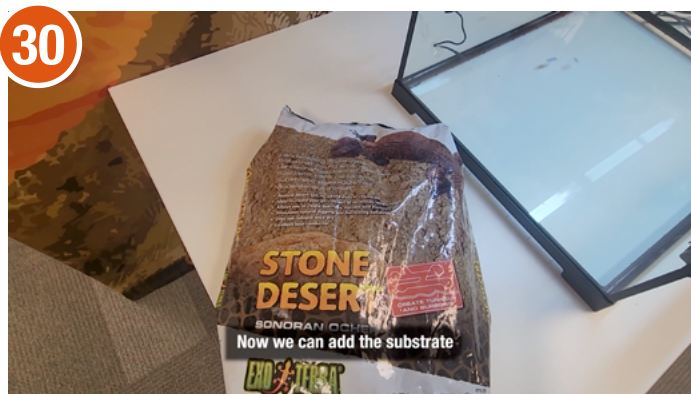

Set the Thermostat to Dimming Mode and temperature to 28 C

Power on the T5 unit

A cable tidy can be used to hold the probe (available separately)

Now we can add the substrate
